

Introduction

Education is a companion which no further can depress, no crime can destroy, no enemy can alienate it and no nepotism can enslave. It is maxim that urged me to think higher right from my young age. I am Mr. XXXXXX permanent resident of Buddhabatika Municipality -12, Kapilvastu(district), Nepal. I belong to a good family so the financial status of my family is stable. My parents have always encouraged me to achieve my career goal. Hence, with my family support I am wishing to study abroad.

Academic

Well, I passed my SLC education from Residential English Boarding School with 80 % which is First Division with Distinction in 2013. Similarly, I have completed my 10+2 education from Tiltottama H.S.S College in science stream with 61.80% which is first division in 2015. After that, I appeared IELTS examination in 26-02-2016 and scored 6.0 Overall, after that I started to do training of Diploma in Computer in Golden Institute for six months and completed in 06-08-2016, then it was time to look after the good college for my higher study, so I started researching on many colleges and universities.

Since, my childhood I was quite interested in Aviation related study but at that time I did not have idea about that, so in order to fulfill my dream i started to search Aviation courses. As we know time plays vital role to build our career, if my base is not strong then sure i will not be able to fulfil my dream easily, so in order to make my base strong as well as my future bright, I am choosing Aviation study for my higher study.

Why Australia

From my perspective, I believe in practical approach of study, which I can find in abroad , while going through internet and discussion with my relatives and friends, I heard about many colleges and universities with many facilities in different countries , but after long research, I decided to study in Australia. The main reason behind to choose Australia for my higher study is that in my country there are very few colleges which provide Aviation related study and that few colleges have lack of resources. Adapting good education quality will help me to broaden my knowledge and sharpen my ideas to ensure work in my related field. In Nepal it is easy to develop sound theoretical knowledge, but it big challenge to develop expertise in respective fields. I am drawn towards advanced education system in developed countries like Australia, USA and UK. Among them Australia is my prime priority for higher studies for number of reasons. To begin with,

Australia is third largest education destination in the world despite of 23 billion population. Australian education system is one of the globally known leading education systems in the world which produces successful and skilled graduates who excel in their field of study. It is praise worthy that Australian education system gives recognition to Bachelor level degree. It has five of the 30 best cities in the world for students based on student mix, affordability, quality of life, and employer activity with modern and innovative facilities preparing them to succeed in their career plans ahead. Furthermore, Australia is known as a mega-diverse country in every field like environment, climate, culture, religion, cuisine etc. This diversity facilitates people to live freely in Australia with no problem of racism, high crimes or anything like that. Many international students report that they generally feel safe. International students can rely on country whose law promotes quality education, training and protection of international students that is ESOS (Education Service for Overseas Students) and National code of practice. Australian people are known to have one of the best lifestyle in the world which fascinates me. In today's world where everything is fast-paced and people in developed countries are becoming more materialistic, I find Australia as a place where people value work as well as enjoying in life. Studying in Australia will give me chance to add so much to my personality and strengthen it by being a part of multi-cultural environment and highly developed society. Beside this Australia has zero crime rate in comparison to USA. Additional Scholarship Test or other examinations like SAT,ACT,GRE,GMAT are not generally required to study in Australia as compared to UK and USA . Similarly, Australia allows international students to work part time and had provision of PSW after completion of education which lacks with other English speaking nationals. Australian education programs represent great value for money. Australian courses are often shorter than alternatives in other countries , particularly in the USA. They have VET courses and the courses can be transferred into Bachelor so that we can finish Bachelor in around 2 years after VET courses that saves money and time. Most Australian Bachelor degree courses can be completed in three years and even less if the education provider works on a trimester system. This means that i can save a whole year's tuition fees if I choose to study in Australia rather than in the US or the UK.

About Course and Future Plan

I am applying for Certificate III in Remote Pilot(Visual Line of sight) leading to Diploma in Aviation Management. Certificate III in Remote Pilot consists of 14 core units some of them are mentioned below:

AVIE0001-Operate aeronautical radio

AVIF0013-Manage human factors in remote pilot aircraft systems operations

AVIW3037-Manage remote pilot aircraft systems pre- and post-flight actions

AVIW3038-Operate and manage remote pilot aircraft systems

AVIY3073-Control remote pilot aircraft systems on the ground

AVIY3074-Launch remote pilot aircraft systems

AVIY3077-Manage remote pilot aircraft systems in abnormal flight situations

AVIY3078-Manage remote pilot aircraft systems energy source requirements

Whereas, Diploma of Aviation Management consists of total 21 units, among them 7 units are core units and 14 units are Elective units, and some of them are ,

AVIF0004-Implement aviation risk management processes

AVIF0005-Manage aviation risk

AVIF0006-Manage disruptive behaviour and unlawful interference with aviation

AVIO0002-Manage meetings

BSBADM502-Initiate a quality audit

BSBLDR802-Lead the strategic planning process for an organisation

BSBWHS501-Ensure a safe workplace

BSBMGT502-Manage people performance

BSBWOR501-Manage personal work priorities and professional development

BSBMGT516-Facilitate continuous improvement

BSBSUS501-Develop workplace policy and procedures for sustainability

AVIK3002-Use info technology devices in work place

I have chosen this course because the Certificate III (Remote pilot- Visual Line Of Sight) is a qualification that allows me to learn about the aerospace technique related operations of remotely piloted aircraft systems. In this course i will be learning the strict requirements for the certification by the civil Aviation Safety Authority (CASA) of Australia that relates to remote pilot technology like drones and other unmanned aircraft. Not only will get to achieve the certificate III in Aviation, i will also have opportunity to receive a CASA license in unmanned aircraft operations, and also an operator radio license. All of which are highly valuable certifications that are recognized globally. As Nepal is one of the Himalayan countries, initially drone is used to carry important raw materials where transportation is not facilitate. With the use of drone, Civil Aviation Authority for Nepal (CAAN) was established in 2053 which brought laws to use it in the country. Now, drone is used in military services, rescue operations and for recreational purposes like taking personal photos, and videos. Further, in the Diploma in Aviation

(Aviation Management), I will be learning specialized aerospace modules which are not only in nature but in demand internationally, and these skills are in dire need in Nepal's Aviation industry. We are at a point where we need the technical skill sets to support the exponential growth of the industry. Such niche skills are not able to be professionally taught or trained in Nepal, but overseas countries where the Aviation industry is mature and highly regulated. As well as Australia is one of the only few countries that has invested heavy research resources in the drone industry, and I foresee that my knowledge will support the growth of unmanned aircraft industry in Nepal. In the other hand, it is clearly evident that Nepal has gone through a big Aviation boom, producing surplus amount of aircraft pilots but lacks operational ground crew which Nepalese Airlines are outsourcing at the moment. The mission of CAAN (Civil Aviation Authority Of Nepal) is Ensuring Safe, Secured, Efficient, Standard and Quality Service in Civil Aviation and Airport Operations. I am certain that with the skills I learnt in Aviation Management, I will be able to contribute to the efficiencies and professionalism of the operational Aviation sector with in Nepal, a great specialized management program that is going to set us apart from the rest of my peers who just has generic management background.

Why AIBT?

At the very first it was very hard to choose a right and good college which will provide me the qualitative and accredited education in Affordable tuition fee. I was there at ECAN fair Nepal, there I got opportunity to meet Mr. Michael Munstock Senior Business Development Manager of AIBT, I found him very interesting, he told me everything about the college, after that my all confusion were clear about Australian Education . He described me about possibilities and opportunities about studying in Australia and he also told me about studying option with AIBT which exactly match my interest because I am very much interested to study Certificate III in Remote pilot leading to Diploma in Aviation Management from my grassroots level. I found AIBT provides both theoretical knowledge along with practical skills, AIBT also offers another great option to be able to have 2 weeks job observation opportunities which attracted to choose AIBT. Most importantly, it has integrated student support network that includes welfare, academic and career support to assist students throughout the learning journey. This will definitely help me gain an academically, culturally and socially enriching experience from my time with the college. As well as, AIBT will customize a training program will qualified professionals to come to our business and conduct in-house training sessions. Likewise, if I wish to further my studies in a local university, AIBT tertiary support team will help me in the

university application for recognition of prior learning to gain credit or credit transfer. To make myself confident of choosing AIBT as my Education provider I have done research of other institution although there are not much institution that provides Aviation related study in Australia, but I have researched few colleges, they are Swinburne University Of Technology, Griffith University, Academies Australasia. Among them In Academies Australasia which is located in Sydney, there I didn't find my related course, this institute does not provide Aviation related course. While, it came to Griffith University , it provides Bachelor of Aviation Management, with course duration of 3 years, with IELTS requirement 6.5, but my IELTS marks didn't meet the requirement , when talking about fee it is 29,500 AUD\$ per year which is quite expensive, So I didn't choose this University, but after the completion of diploma in aviation management, I will further my Bachelor study in Griffith University, because it is also located in Brisbane ,and AIBT will transfer my credits to this University in future. The last one is Swine burn University of Technology which I researched , there I found Graduate Certificate Of Aviation Management course duration of 6 months/semester with 2 semester leading to Graduate Diploma Of Aviation Management course duration of 1 year/semester with 2 semester ,which will cost higher than AIBT. AIBT provides Certificate III of Remote Pilot(Visual Line Of Sight) 7 months course with total fees \$6000 AUD leading to Diploma In Aviation Management of 52 weeks with total fees \$10,000 AUD, which is quite affordable, whereas, AIBT is located in Brisbane which is my dream to go there and study, there are many reason why i would like to stay in Brisbane because Brisbane , it is the capital of Sunshine state, where I can find best climate to enjoy my study. Brisbane is one of the Australia's most affordable place to study , tuition fees and the cost of living expenses are more affordable compared to other developed countries or Australian capital cities, as well as ,there is Reliable Public Transport, with train ,bus and ferry connection , we will easily commute to our classes each day. Beside this, right in heart of Brisbane we will find number of parks and river activities, where I can visit in my weekends. One of my friend Mr. Abishek Bista recently he is enrolled in AIBT, which will be easier for me for my accommodation,that we can stay together during my entire study. He gave me allots of information about AIBT which helped me to choose this college for my further study.

Financial:

My parents will be sponsoring for my study and other expenses. My father is currently serving in Assam Rifle of Indian Army as well as my mother is office secretary of community forest in our home town. To cover the financial, my mother has around 35 lakhs Nepali Rupees in her bank account to cover my all expenses. I will use that fund for my stay in Australia.

Last words

Finally, I would like to assure the Australian High Commission that my only purpose of going to Australia is my study and if I get a chance to be the student at AIBT, I will try my best to live up to the expectations of the College and to contribute in making its image stronger with my conduct. Though this will be my first experience of being away from my hometown and country for a long time, I am confident that my persistence and hard work will keep me driving to reap as much as I can and I am hopeful that your country will assist and encourage me to take out the best in me.

I hope you will consider my application and allow me to study in Australia.

Sincerely,

.....
