

**Statement of Purpose**  
**To Whom It May Concern:**

I am glad to introduce myself as XXXXXX. I have successfully completed School Leaving certificate (S.L.C) in 2013, with first division and also completed my Higher Secondary Education Examination (H.S.E.B) in 2015, with second division. After completion of H.S.E.B i want to uplift my further education in abroad, so i had taken 3 months TOEFL preparation classes and taken the exam on May 22 2016 and score i obtained is 66.

After completion of my class 12, I want to go to abroad for my further education. I would like to put to use this knowledge to do my further studies in automotive engineering. This will give me the leading edge in Technology and information that i require. For the past few decades mankind is advancing towards the realms of science and technology. And i would like to be the integral part of such advancement and achievements. For this, research would be prime importance with hands on experience in real environment. My ambition is to work at the forefront of the vehicle mechanical technology with the ability to find the innovative solution to the changing needs.

The reason to choose Australia for my further education rather than studying in my own country is because Australia is a dynamic and vibrant country with a great deal to offer students looking for international education. Choosing to come to Australia to study will provide student with a whole new view of the world and wonderful opportunities and experiences, not to mention exciting and progressive world-class education programs. Australian education programs represent great value for money. Australian courses are often shorter than alternatives in other countries, particularly in the US. Most Australian bachelor degree courses can be completed in three years and even less if the education provider works on a trimester system. This means that student can save a whole year's tuition fees if we choose to study in Australian rather than in the US or the UK.

**Why study with Australian Skills Group (ASG)?**

There are so many reasons for choosing ASG for my further studies, some of them are:

- Small class size
- Excellence in teaching quality
- Offers face-to-face delivery methods and personalized approach with each student
- Articulation with various tertiary educators around the country to ensure pathways into university study
- Above facility provides credit towards tertiary pathway, cutting the time and cost of further education.

### **Certificate III in Light Vehicle Mechanical Technology:**

The certificate III in light vehicle mechanical technology course aims to provide knowledge and skills in the field of light vehicle mechanics. We will gain skills in the automotive industry, especially in the area of mechanics and light vehicle. It opens doors to employment within the automotive industry, especially for light vehicles and business ownership. On successful completion of the course, we will be awarded the certificate III in Automotive Mechanical Technology. As part of the Australian qualifications framework this program is nationally recognised.

### **Why Brisbane in Australia?**

The city has a highly sophisticated education infrastructure with a growing global reputation as a centre of excellence in medical research and development, technology and innovation, and environmental sustainability. Brisbane is close to the northern tropics in Queensland, and this keeps the city at the frontier of emerging research fields such as the biosciences and tropical sciences. So I have selected Melbourne for my further studies.

### **Future career:**

Like India or other countries, automotive industry volume is growing in Nepal. But, the manpower for vehicle mechanical technology is very hard to find with Excellency. When I researched for the market of Nepalese automotive industry, it is in starting phase and it will be growing with time. So, for graduates like me have a very potential market and job opportunities while I will be in Nepal on completing the courses from Australia. Recent time Nepal is an important market for Tata Motors, Hundai, Volkswagen, Swift etcand that's the reason that after any launch in India, the first international market launch of products is done in Nepal. In addition, the reason for choosing this course is because it is much on demand these days. It will help me to acquire a broad knowledge in all aspects of vehicle mechanical technology. The courses can also help me gain in-depth knowledge and advanced skills of mechanical technology.

Furthermore, after gaining practical as well as theoretical concept of mechanical technology will come back to my country. I will also be getting number of career opportunities relating to this field within private companies like Batas Ltd, Sipradi Trading or the public sector.

Moreover, my purpose of entering Australia is entirely to study the intended course and I will be returning after its completion on time. I am very much aware about the rights and duties that have been granted to a foreign national on Student Visa in Australia.

Thank you,

Regards,

XXXXXXXX
